

BALANCED LURES LUCKY JOHN

Balanced lures of LUCKY JOHN Trademark have already won popularity among the best ice lures in many countries across the world. They have shown themselves to the best advantage according to many anglers. Year in year out their models are developing, bringing new changes and additions to their design, making them more attractive to the predators.

Currently the LUCKY JOHN balanced lures resemble natural prey items – the fry so much that bite is virtually guaranteed at any time, irrespective of activity of fish. An ideal game of the lure, imitating an escaping fry, allows not only luring a predator immediately under the hole, but also attracting it from a longer distance. Besides, the excellent balancing of

the lure allows harvesting a maximum large water area under the hole. Several models, rich variety of colours and sizes allow matching necessary lure in order to catch more fish and to enjoy fishing as much as possible! LUCKY JOHN balanced lures model CLASSIC and FIN are equipped with strong and sharp KAMASAN hooks.

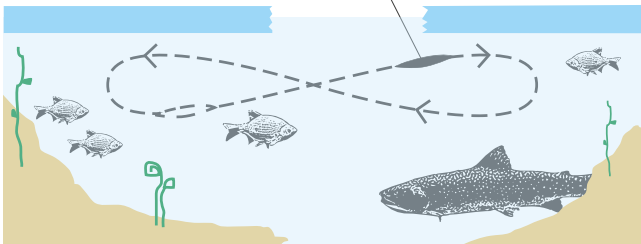

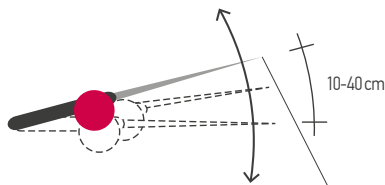

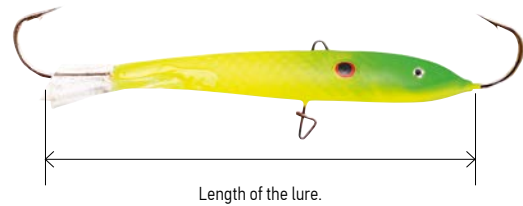

Additional designations in marking

H – holographic coating

RT – red tail of the lure

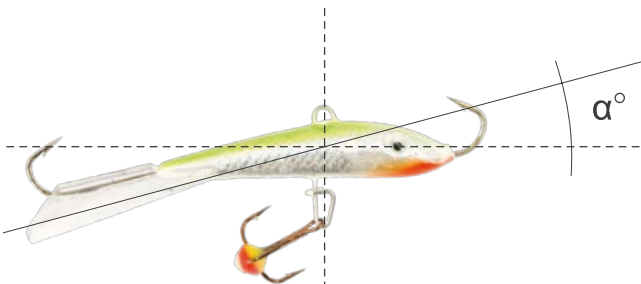

Particularly strong fastening of PC tails that come in two colours

KAMASAN strong and sharp Japanese hooks

KAMASAN

All lures are individually packed, irrespective of the size, they come completed with a treble hook with a coloured drop.

BALANCED LURES LUCKY JOHN CLASSIC

The most popular among anglers model. A hard tail of the lure makes the lure a wider and quicker play. During stirring of the predators you can achieve the best results thanks to these lures. Please note, there are two colours of the tail available in assortment – red and transparent. All lures are individually packed, irrespective of the size, they come completed with a treble hook with a coloured drop.

BALANCED LURE LUCKY JOHN CLASSIC 3

The smallest lure among CLASSIC balanced lures. Optimal application of the lure is the depth up to 3 meters. For fishing it is recommended to use monofilament line with diameter from 0.12 to 0.16 mm.

ITEM NO.	COLOUR (****)	HOOK (NO.)	WEIGHT (G)	LENGTH (MM)	Q-TY IN A PACK (PCS.)
81301-****	03H; 04H; 12HRT; 15H; 20; 26RT; 31RT; 41; 45H	14	5	30	ind. pack

BALANCED LURE LUCKY JOHN CLASSIC 4

One of the most popular sizes of a lure for perch fishing at the depth of up to 4 metres, 40 mm long. A pike or a pike-perch, if this lure comes within sight, won't help biting it. The play of the lure attracts the predators at a long distance, provided you use monofilament line of 0.14 to 0.18 mm or a braided line of 0.09 – 0.11 mm.

ITEM NO.	COLOUR (****)	HOOK (NO.)	WEIGHT (G)	LENGTH (MM)	Q-TY IN A PACK (PCS.)
81401-****	03H; 04H; 12HRT; 15H; 20; 26RT; 31RT; 41; 45H	12	6	40	ind. pack

BALANCED LURE LUCKY JOHN CLASSIC 5

A very popular balanced lure for fishing of a medium and big perch at the depth of up to 7 – 8 metres. The length of the body is 50mm. The lure can be used in streamlet water courses. An optimal diameter of the used line is 0.16 – 0.20 mm, of braided line – 0.09 – 0.11 mm. Depending upon likings of a local predator you can match a necessary colour of the lure. The lure can be successfully used for fishing of pike, perch and pike – perch.

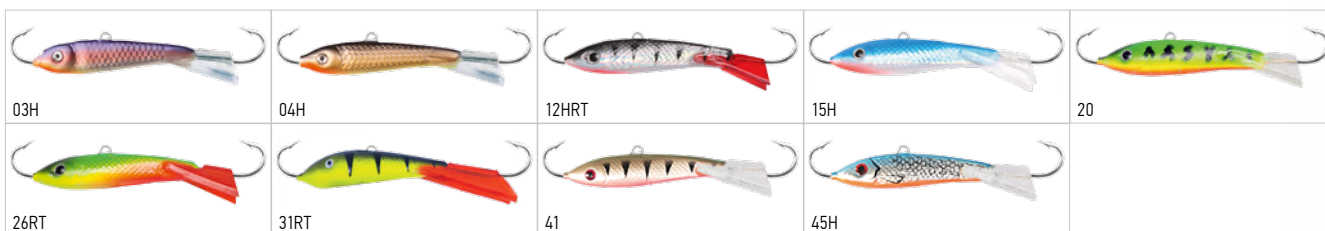

ITEM NO.	COLOUR (****)	HOOK (NO.)	WEIGHT (G)	LENGTH (MM)	Q-TY IN A PACK (PCS.)
81501-****	03H; 04H; 12HRT; 15H; 20; 26RT; 31RT; 41; 45H	12	13	50	ind. pack

BALANCED LURE LUCKY JOHN CLASSIC 6

A popular among anglers balanced lure for fishing of a big pike-perch, a perch and a pike. The length of the lure is 60 mm. For pike-perch fishing it can be successfully used at the depth of up to 13 metres, provided there is no stream in the pond. The following colours are particularly efficient for pike – perch: with blue back, “red head” – 18 and glowing – 33. Proved that at bad bite a pike – perch reacts to the colour 37. One should bear in mind that a pike, like a pike – perch, “respects” very much the colours of lures that have red tones. For perch fishing it is recommended to use a monofilament line of diameter from 0.18 to 0.25 mm (for pike and pike – perch fishing – up to 0.30 mm) or a braided line of 0.11 – 0.15 mm.

ITEM NO.	COLOUR (****)	HOOK (NO.)	WEIGHT (G)	LENGTH (MM)	Q-TY IN A PACK (PCS.)
81601-****	03H; 04H; 12HRT; 15H; 20; 26RT; 31RT; 41; 45H	10	16	60	ind. pack

BALANCED LURES LUCKY JOHN FIN

The FIN balanced lures have a flatter body in section than the CLASSIC model. Therefore the "Fins" harvest a larger underwater area. The FIN lures come in three sizes, out of which you can easily pick up a necessary size for fishing of a perch, a pike or a pike-perch, as well for different levels of luminosity under water. All lures are individually packed and come completed with treble hook and coloured drops.

BALANCED LURE LUCKY JOHN FIN 3

The smallest lure among the FIN model balanced lures, is 40 mm long. An optimal application of the lure is the depth of up to 3.5 metres. For fishing it is recommended to use a monofilament line with diameter of 0.12 to 0.16 mm. While fishing, please, don't forget to fish through the depth of water: from the bottom to the lower edge of ice. Sometimes a big perch "follows" a lure to the ice and decides to attack only under the hole.

ITEM NO.	COLOUR (****)	HOOK (NO.)	WEIGHT (G)	LENGTH (MM)	Q-TY IN A PACK (PCS.)
71313-****	12HRT; 13H; 15H; 16H; 19; 20; 21; 24; 26RT; 31RT; 36RT; 41; 44H; 45H	14	4	40	ind. pack

BALANCED LURE LUCKY JOHN FIN 4

A medium – size lure from FIN series. This lure can be successfully used for perch, pike and pike –perch fishing at the depth of up to 6 metres. For these lures it is recommended to use monofilament lines with diameter of 0.14 to 0.18 mm, or a braided line of 0.09 up to 0.11 mm. Depending upon likings of local predators, you can pick up a required colour of the lure. At pike fishing don't forget to use a wire leader.

BALANCED LURE LUCKY JOHN FIN 5

A popular among anglers balanced lure for big perch, pike-perch or pike, is 70 mm long. For pike-perch fishing it can be successfully used at the depth of up to 13 metres, provided there is no stream in the watercourse. For big perch fishing it is recommended to use monofilament lines with diameter of 0.18 to 0.25 mm (for pike-perch and pike fishing – up to 0.30 mm), or a braided line of 0.11 up to 0.15 mm.

MAIKO

BALANCED LURE

LUCKY JOHN PRO SERIES MAIKO **NEW**

MAIKO – a new and original spin on the classic jigging minnow, especially designed to mimic feeding baitfish and fry. This classic jigging minnow design has been given a new update, based on Japanese design and hook technology, designed to attract active feeding predators such as jumbo perch, slab crappies, all varieties of trout, aggressive walleyes and northern pike; basically any predator that finds realistic minnow imitations as a need to feed. The Maiko rings the dinner bell for all predators.

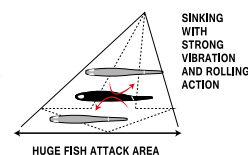

The Maiko is constructed with a durable, impact resistant ABS body, designed to hold up to the toothiest predators for long term

performance and value. The Maiko also features a center core lead balancing weight, assuring neutral or negative buoyancy and realistic action at any depth. The core balancing weight will allow the angler to vary the action dependent on the bite; whether the bite is passive or aggressive, the variable neutral or negative buoyancy action allows the angler to present either an actively feeding baitfish on the bottom, or a wounded and distressed baitfish on the drop and the rise.

The Maiko is most effectively fished in both open water and ice fishing scenarios over both hard rocky bottoms, as well as transi-

tion points where emerging larvae and mucky bottom aquatic bugs and flies are targets for feeding baitfish. The Maiko is also very effective as a jigging minnow presented to a school of suspended crappies looking to feed on realistic baitfish lures that present the natural action that the Maiko performs, in a variety of presentations.

The Maiko is available in four different sizes, and in a wide selection of realistic finishes that is the hallmark of all Lucky John lures. As with all Lucky John lures, the finest quality Japanese hooks put the finishing touch on the most versatile and effective jigging minnow on today's marketplace.

MEBARU

BALANCED LURE LUCKY JOHN PRO SERIES MEBARU

MEBARU is a new balancer especially designed for angling of predatory fish from the ice or vertically from a boat. The lure has sufficient weight; therefore, it is effective for angling of fish at great depths, on rivers with low current or from a drifting boat. It ensures accurate and stable play at any depth. When angling with this lure, the technique used is similar to the one used when angling with balancers or spoon-baits. It is recommended to take a pause of one or more seconds between the drops of the lure, depending on the activity of predatory fish. The structure is a single cast made from frost-resistant ABS Plastic. A long tail is highly durable and ensures precise turns of the lure in the

extreme points of the trajectory of its movement. During the pause, the lure returns to its initial point always head first, which does not alarm the predatory fish, but rather attracts it even more. Its spinal fin made of brass has three holes. The play of the MEBARU lure will differ depending on the hole to which the fastener is attached.

1. Fixture of the lure by the middle hole. In this case, its play is wider – the fishing area is the greatest and the lure moves away from the centre for the maximum distance. In case of such fixture, the lure creates maximum fluctuations of water and become more noticeable

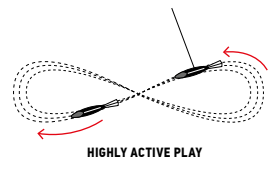

for predatory fish while staying at a distance of several metres from it. Recommended for fishing at great depths, in places where there are no snags or aquatic vegetation, as well as during the period when the first ice appears.

2. Fixture of the lure by the front hole. When moving, the lure has the greatest vertical component and more aggressive play. Recommended for angling when the search of fish is carried out by orderly fishing out different depths.

3. Fixture of the lure by the rear hole. When angling the fish using this fixture of the lure, its play is calmer and the area of fishing is slightly smaller. A highly effective method when angling in the dead of winter and in places with snagged bottom or aquatic vegetation.

Special "bloody" series of colours distinguish this lure from other lures with tedious colours, thus promoting fast and effective attack on the fish.

MEBARU lure is equipped with two high-quality Japanese hooks OWNER. Recommended for angling of pike perch, pike, trout and large perch. The lure is developed in Japan.

BALANCED LURE LUCKY JOHN BALTIC

NEW

The Lucky John Baltic is a compact, weighted jigging minnow designed to fish at depths, with or without current. Available in 40mm, 50mm and 60mm sizes, these three models weigh 10 grams, 22 grams, and 46 grams respectively; the smaller size Baltic has been a go to perch bait for anglers worldwide, with the larger models being a particular favored lure for deep water walleyes.

The Baltic is available in clear or red options for the rear tail stabilizer, and are also available in attention grabbing holographic patterns that stand out in deep or stained water. Like some of its Lucky John cousins, the Baltic is made of tough, resistant materials made to stand up to the wear and tear or predator fishing. The fierce "samurai" detailed finish is augmented by Japanese Kamasan hooks front and back, along with a sticky sharp beaded VMC hook on the bottom.

BALANCED LURE LUCKY JOHN OSSA

NEW

The Ossa represents a new twist on the jigging minnow concept combining elements of both vertical and horizontal presentation, aimed at replicating the actions of a fleeing baitfish. The unique action of the Ossa is created by the fishing line through the body of the lure, rather than the typical attach points at either the mouth or "dorsal fin" of the traditional jigging minnow. The Ossa features quality Japanese hook finished off with natural wool fibers for a realistic swimming action. The Ossa comes in 30mm, 40mm, and 50mm sizes, weighing 6 grams, 10 grams and 16 grams respectively; this size selection makes the Ossa a perfect choice for perch, walleyed pike, and northern pike.

WINTER SOFT LURES LUCKY JOHN

Winter Lucky John lures have stable flavour and smell (cancer or shrimp). The flavouring and aromatic substances are not only applied to the lures surfaces, but also are the part of lures material. Scent&Taste Inside Formula guarantees that 65% of attractant is placed inside lure material, other 35% composes special substance used for lures treating before packaging. The attractant composition is a secret of Lucky John Company. This way in these lures made of the „eatable rubber“ an attractant is maximally kept for the long time. The colour-grade is also well matched, the range of lures includes all colours, popular among fishermen, therefore, it is easy to choose the required one. For example, the popular among perch-fishermen green-brown colour-grade is presented by few colours variants. Among them are Cola (PA16) – well-known „engine oil“ and close to this colour Nagoya Shrimp (085), „american“ Green Pumpkin (PA03) and Dark Green (SB05). There are many other variants of colourations, so Lucky John has its solution for all kinds of predator's mood.

ARTIFICIAL MAGGOT LUCKY JOHN MAGGOT PACKAGE

Artificial maggot Lucky John Maggot – an excellent substitute for a popular natural buzzer due to its necessary flavour and scent. Apart from that, it has a number of advantages in comparison to the real maggot: it surpasses the real maggot in attractiveness, does not freeze at low temperatures, holds on a hook for a much longer time, does not pupate, has unlimited shelf life and is always at hand while fishing. The artificial maggot Lucky John Maggot is offered in sizes of 12 mm and 14 mm for the best use in any situations.

ITEM NO.	DESCRIPTION	LENGTH (MM)	COLOUR	Q-TY IN A PACK (PCS.)

★ 140203-033	Maggot Lucky John Maggot	14	phosphoric	25

ARTIFICIAL ROE LUCKY JOHN TROUT ROE PACKAGE

Lucky John Trout Roe is a full imitation of the trout roe with the scent and flavour; it is intended for angling of predatory and non-predatory fish. It may be used in combination with natural bait, as well as separately. In order to ensure additional attractiveness of the bait, it will perfectly suit as a bait on a treble or a single hook of a spoon-bait or mormyshka. The buzzer Lucky John Trout Roe is offered in sizes of 4.5 mm and 6 mm. P. S. Not recommended to be stored in refrigerator due to possible accidental mistakes.

140205-001	Roe Lucky John Trout Roe	6	orange	60

ARTIFICIAL BLOODWORM LUCKY JOHN EXTRA BLOOD WORM PACKAGE

A must-have lure for winter fishing and an excellent choice – artificial bloodworm Lucky John Extra Blood Worm. Despite the small size, the artificial bloodworm attracts the fish no worse than the real one, while its bright colour contributes to that even more. The bloodworm has long-lasting scent and flavour. During winter, while passing from one ice-hole to another, the real bloodworm will instantly freeze on a hook and lose all of its attractiveness. The artificial bloodworm not only will not freeze, but also will wag its tail just as lively even after repeatedly being swallowed by a fish. Even if your winter fishing came off due to some viable reasons – the artificial bloodworm Lucky John Extra Blood Worm will never deteriorate and will be waiting for its time.

ITEM NO.	DESCRIPTION	COLOUR (****)	Q-TY IN A PACK (PCS.)
140201-001	Artificial bloodworm	red	200
140201-002	Artificial bloodworm XL	red	160

SOFT LURE LUCKY JOHN TROUTINO PACKAGE

New to the Lucky John lineup this year is the Troutino, a realistic and life-like tadpole or small baitfish fry imitation, made of entirely of biodegradable materials. This “edible plastic” technology an effective, ecological friendly micro-plastic option that contains the trademark Lucky John scent dispersal and retention system. The Troutino is infused with shrimp flavor, designed to be irresistible to trout and other hardwater predators. The Troutino comes in three sizes and a variety of color options, allowing the serious ice angler a multitude of presentation options.

TUNGSTEN MORMYSHKA WITH AN EYELET AND COATING LUCKY JOHN "DROP"

A hook is soldered to the body of the jig so that the lure has acquired the best hooking capacities. The line is fastened to the eyelet of the jig, thereby it preserves its strength at the joint longer. Therefore you won't miss your precious trophy and keep your favourite lure for a longer time. The protection coating of the lure – polymeric powder coating with different patterns. The lure comes in 6 colours.

TUNGSTEN MORMYSHKA WITH AN EYELET, BEAD AND SWAROVSKI CRYSTAL LUCKY JOHN "DROP"

An original lure in the shape of a drop with a plastic bead in the shape of an eye and with an original SWAROVSKI crystal. At a play of Mormyshka, the shining facets of the crystal create patches of light, which attract fish. The jig case is coloured with polymeric powder enamel of 5 colours.

TUNGSTEN MORMYSHKA WITH AN EYELET AND FLUORESCENCE DYE LUCKY JOHN "NYMPH"

Between the eyelet and the hook, in the upper part of the jig there is a rust fly, which shapes the jig like a nymph and improves its catching capacity. These jigs have an outer coating made of Japanese luminous paint, with indent pattern. In darkness, depending upon the charged light the jig continues its attracting light emission for up to two hours.

TUNGSTEN MORMYSHKA WITH EYELET LUCKY JOHN “SUPER BANANA”

The Lucky John Super Banana tungsten jig developed from its slightly smaller cousin, the LJ Banana. The Super banana features a variety of attention getting patterns, all featuring vibrant epoxy finishes designed to stand the test of time. The result is a versatile tungsten jig that may be presented in a variety of situations, with or without the use of live bait or plastics.

TUNGSTEN MORMYSHKA WITH EYELET LUCKY JOHN “BANANA”

An efficient mormyshka developed in Latvia. This lure has proven to be very useful for ice angling in many countries. The optimal size and shape of the lure create microfluctuations which are extremely attractive to fish, allowing them to be caught without the use of natural bait.

TUNGSTEN MORMYSHKA WITH EYELET LUCKY JOHN “БАНАН”

The Lucky John Banana is the smaller, finesse model of its cousin, the Super Banana. The Banana also features the same bright quality epoxy finish in a variety of proven patterns. It also can be fished with or without live bait or plastics; the Banana is designed to provoke bites when the situation calls for a more finesse, slightly smaller profile presentation for stubborn bluegills and reluctant crappies.

TUNGSTEN MORMYSHKA WITH EYELET LUCKY JOHN “ANT”

The Lucky John ANT is designed to imitate aquatic bugs that are the staple diet of many winter gamefish, such as panfish and perch. This pattern is designed to attract attention even during the toughest of bites, becoming the ice angler's go to jig pattern, when all else fails. Offered in a variety of vibrant and attractive patterns, all with the same quality epoxy finishes Lucky John is known for.

TUNGSTEN MORMYSHKA WITH EYELET LUCKY JOHN “SEED”

The Lucky John SEED is a basic oval shaped jig in the form of size of a small seed that is offered in copper, silver, and gold finishes. The relatively flat and rounded design of the jig allows a realistic vibrating action when fished as a horizontal presentation, using a Russian snell knot to ensure the jig remains at a 90-degree angle to the line. This jig can also be effectively utilized in a finesse vertical presentation with or without live bait or plastics. The jig features top quality Hayabusa hooks, engineered in Japan.

TUGSTEN MORMYSHKA WITH EYELET, WING AND BEADS LUCKY JOHN “NYMPH”

These jigs are made on the basis of the 8243 “Nymph” series jigs with an eyelet, represented by two sizes and one classic black colour. These jigs have beads of corresponding colours and an additional moving wing – diaphragm. Even at a slightest wobbling of the jig under water, the diaphragm starts moving and swings like gills or tarsus of an underwater insect, but the contrasting beads, as an aim, serves as the target of an attack.

The anglers know that there are days when fish bite well a particular spoonbait, more exactly, a spoonbait of a particular length and colour. Lucky John every year offers new models of lures for fishing of various fish species: from small perches to huge Pike-Perches. Natural coating from silver, gold, copper and nickel silver, brass and their combination are used for production of lures. The spoonbaits are divided into the following groups:

- ▶ the lures made by punching out of a brass leaf;
- ▶ the lures made according to the powder metallurgical technique;
- ▶ the lures moulded from lead alloy.

Lures made by moulding of a bait body out of a brass leaf. This is a classical technique, which engages final handmade polishing of the bait and application of galvanic and protective coat. The spoonbaits made out of brass have higher density than steel and allow working as bait at smaller sizes at a greater depth. This group includes the baits under the following Article numbers:

8274-8278, 82751-82762, 8374-8376, 6230-6260, 6530-6550, 6730-6760, 6963-6987, 7130-7160.

VERTICAL LURE WITH TREBLE HOOK LUCKY JOHN "S-1"

Popular ice spoonbaits for fishing of the smallest or fastidious predators. This bait is used at shallow water and for fishing in submergent vegetation or next to snags. We recommend using the thinnest line.

VERTICAL LURE WITH TREBLE HOOK LUCKY JOHN "S-2"

The most popular ice spoonbait of this series, which as always comes to help, when the bait is very bad. Designed for perch fishing, but if a Pike-Perch is passing nearby – the bite will follow for sure.

ITEM NO.	COLOUR (*)	LENGTH (MM)	WEIGHT (G)	DEPTH (M)	LINE Ø (MM)	FISH	Q-TY IN A PACK (PCS.)
8275-*	S; G; C	42	3	Up to 4	0,12-0,14	perch	ind. pack

VERTICAL LURE WITH TREBLE HOOK LUCKY JOHN "S-3"

A ice spoonbait is designed for fishing of big perch and medium Pike at the medium depth. At perch fishing, please, check the depth up to the surface under the ice, sometimes a big perch hunts in the headwater, a Pike should be fished only at the bottom, desirably next to snags.

ITEM NO.	COLOUR (*)	LENGTH (MM)	WEIGHT (G)	DEPTH (M)	LINE Ø (MM)	FISH	Q-TY IN A PACK (PCS.)
8276-*	S; G; C	55	6	Up to 7	0,14-0,18	perch, pike	ind. pack

Lucky John offers an assortment of vertical spoonbaits with daisy chain for ice fishing. A treble hook at the end of a miniature chain pendent to the bait with a coloured drop or a single hook with an eye – this is a time-proved lure for fretful fish. This tackle is very popular among Scandinavian fishermen for a good reason. It is useful throughout winter, but the effect of its using is particularly notable in early spring, when ice on watercourses is thick enough and shortage of oxygen is felt in water. At this time fish are dormant, and maturing hardroe starts bursting their guts. In such cases the spoonbaits with daisy chain come to help. For a perch – with a single hook, for a bigger predator – with a treble hook. Once it sees the bait a perch will continue hunting a “bug”, tucked under the spoonbait, and will persistently bite it until hooked. But “striking” an ordinary spoonbait or a crankbait only once it usually loses further interest to such lures. “S-2” and “S-3” crankbaits of three colours are usually used for lures with chain tackle.

VERTICAL LURE WITH CHAIN AND HOOK LUCKY JOHN “S-2-Z”

Popular spoonbaits for fishing of the smallest or fretful predator. These lures are used at shallow waters and for fishing amid submergent vegetation or close to snags. It is advised to use the thinnest line.

VERTICAL LURE WITH CHAIN AND TREBLE HOOK LUCKY JOHN “S-2-Z”

In terms of design this lure doesn't differ from Salmo “S-2-Z” spoonbait (Art. Nr 82751), only a treble hook, decorated with a coloured plastic drop, is used instead of a single hook. Such kitting comes to help greatly at active bite of a predator.

LUCKY JOHN BEADED TREBLES

The Lucky John beaded trebles are designed for use with both jigging minnows and vertical spoons when a longer drop from the lure would be useful in improving hook rate when fishing for short-striking predators such as jumbo perch, walleyed pike, and trout. These beaded trebles are offered in a variety of sizes, appropriate to all species, and feature razor sharp VMC treble hooks with a multi-colored epoxy bead in the center of the treble hook. The beads are offered in 10 different color configurations, designed to match presentations for all jigging minnow, spoons, and live bait presentations.
